

How to Find a Vision Provider in Network

Step 1:

- Visit www.eyemed.com

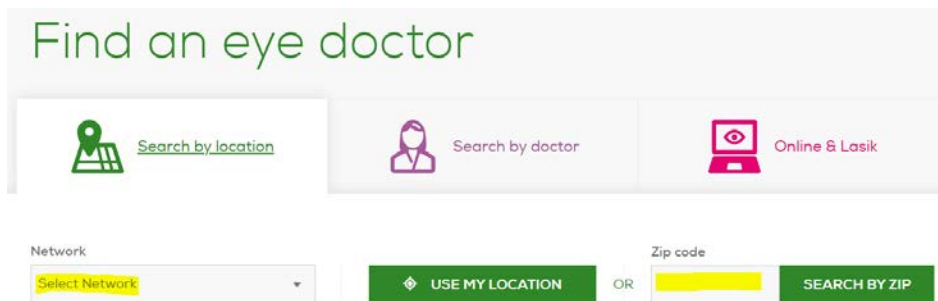

Step 2:

- Scroll down to “Provider Locator” and click on “Find an Eye Doctor”

Step 3:

- Under “Network”, use the drop down and choose “Select Network”, then enter your zip code and click “Search by Zip”

A list of providers will appear.

You can also download the EyeMed mobile app that lets you:

- Find in-network providers
- Download your ID card right to your phone
- Check your claims status
- Find additional savings for eye exams or frames from top brands

*Use the QR code here to directly download EyeMed’s mobile app!

QR codes are a barcode, which allows your smartphones and tablets to recognize and decode the pattern to open a link or application. You can use the code above to download the MyQHealth App! To do so, just follow these steps: 1) Open your phone’s camera, 2) Point the camera on the QR code – your phone should focus on the QR code after a brief moment, 3) Open the QR code’s content – tap the notification that appears on the screen to download the app!
