Your Investment Performance [How to read the table and charts](#)

VIEW YOUR PERFORMANCE

In the table below and when you view charts, your personal rate of return is calculated with a time-weighted formula. The calculated value reflects the result of your investment selections as well as any activity in the plan accounts shown. The personal rate of return is an estimate only and should not be used solely in making investment decisions. You cannot invest directly in a benchmark and benchmark returns may not take into account your same investment contributions, exchanges and other cash flows which makes comparisons with your personal returns difficult. There are other personal rate of return formulas used that may yield different results. Remember that past performance is no guarantee of future results. Also, please note that your Personal Rate of Return may be positively impacted by certain non-market related account adjustments including payments related to settlements and restitutions. Click on an investment to view its performance including quarter-end returns, risk, fees and expenses.

6. You'll be able to either select a target date fund or choose your own investments.

Change Your Investment Elections

If you would like your future contributions to be invested differently, choose one of the options available below.

Help me manage my investments

Target Date Fund

Over time, Target Date Funds automatically invest more conservatively as you approach your retirement date and beyond. Keep in mind, the value of your investment will fluctuate over time, and you may gain or lose money.

[View available target date funds](#)

Select Target Date Fund

I'll manage on my own

Choose your own investments

Take control of your portfolio and choose your investments from a list of available funds. These investments will fluctuate over time and you may gain or lose money.
